Job Description: Middleweight Interior Designer

Job Title: Middleweight Interior designer

Job Type: Full time

Pay: Depends on experience

Location: London Bridge offices

Job Description:

We are a London based interior architecture & interior design studio working in the high-end residential market. We provide dynamic style, unfettered by fleeting trends. The role (and our team) is studio based.

Reporting to the Directors, you will provide spatial and technical design drawings. FF&E and Accessories schemes from conception through to installation, including scheming, sourcing, budgeting and procurement.

The ideal candidate must have:

- A degree, Diploma or equivalent in Interior Design
- 4+ years post-graduate experience with a minimum of 3 years in the residential sector. Preferably high end.
- Full proficiency VectorWorks (preferred) or AutoCad. We do not require 3D.
- Technical drawing proficiency in creating various plans, elevations and detail drawings
- Experience on site with various consultants and contractors with a willingness to understand and solve problems.
- Knowledge of the Microsoft suite.
- Broad knowledge of FF&E suppliers, products and trade costs.
- Financial understanding of project costs and budget awareness.
- Impeccable and concise communication and presentation skills, verbal and written. They must be fluent in spoken and written English.

What we're looking for:

- A strong team player with the ability to perform many tasks across the design process from concept development through to design management, procurement, and overseeing on-site installations.
- Excellent design skills and ability to convey design ideas.
- A confident, loyal, trustworthy, reliable, dynamic person who can hold their own with clients, suppliers and project teams.
- Someone with a proactive nature, great instincts, open to feedback.
- Great project management skills with the ability to manage multiple tasks across various projects.
- An all-rounder interior architecture and FF&E designer

The role breakdown:

- Liaising with directors and team to define their vision and understanding their preferences.
- Developing and producing detailed conceptual design presentations
- Producing technical drawings and tender packages in Vectorworks
- Producing well thought through design intent drawings for joinery and FF&E items.
- Designing and specifying interior detailing such as doors, skirting, ironmongery, cornices, etc.
- Designing kitchens and bathrooms and sourcing finishes and fixtures
- Developing detailed design schemes including the selection of materials and finishes.
- Preparing and developing detailed presentations, drawings, materials, and other documents relating to the FF&E design
- Building and maintaining good supplier and contractor relationships to ensure projects are delivered to Studio standard.
- Designing, sourcing and procuring bespoke joinery and FF&E design, reviewing technical drawings supplied by others.
- Managing the design and procurement process, liaising with manufacturers and suppliers from concept through to completion, ensuring that client project deadlines are met.
- Preparing FF&E project procurement programmes
- Managing FF&E, Accessories and Art inventories and budgets
- Managing and coordinating FF&E Installation with Installation specialists
- Attending site meetings
